

Univ.-Prof. EoE Dr.-Ing. Holger Magel
Technische Universität München
magel@landentwicklung-muenchen.de

The research activities of Prof. Magel center on theories, methods and processes for forward-looking village renewal and participatory landscape planning. He also examines conflict-resolving land management in public infrastructure schemes (hydraulic engineering and road construction, residential planning, nature and water conservation, etc.). He is especially interested in analyzing land management and land administration in an international context. He set up the international postgraduate masters program “Land Management and Land Tenure in Urban and Rural Areas for Professionals” to examine this and other topics.

Prior to his appointment as full professor at TUM (1998), Prof. Magel served as Head of Department and Director General of the Bavarian Administration for Rural Development in the Bavarian State Ministry of Food, Agriculture and Forestry. One of his achievements during this time was the creation of the Bavarian Village Renewal Program. From 1986, he also lectured at TUM and was appointed honorary professor in 1993.
